

Thank you for choosing the Hub Server Script Developed in Skript Plugin, proudly brought to you by VS-Shop. Your support means a great deal to us! To get started with the script, please follow the steps outlined below:

Step 1: Upload the script ([Hub .sk](#)) to your preferred Minecraft server [/plugins/skript/scripts/](#).

Step 1.2: Reload the Hub script by executing [/sk reload Hub](#)

Step 2: This script has a user permission of: [hub.selector](#).

Step 3: There are 1 customizable command [/help](#).

Step 4: If the user has the required permission, they will be able to right click the compass for a functional server selector!

Updates: I am working on this script and updating it as needed!.

We appreciate your trust in our tools and look forward to your success with your Network server!
