

Thank you for choosing us, we appreciate your decision to partner with VS-Shop for your scripting requirements. To facilitate a smooth panel installation on your server, kindly follow the provided steps. Please be advised: for optimal results, ensure your system has a fresh Operating System Installation to prevent any potential errors or overwrites.

Script Operation Steps:

1. Upload the service-starter.sh file to your VPS/Dedicated Server.
2. Grant execution permissions using the command: **`sudo chmod +x <path/to/your/service-starter.sh>`**
3. Execute the script by running: `./service-starter.sh`
4. Throughout the installation process, a database will be generated for you, accompanied by a pre-assigned password. For security reasons, you have the option to modify the password after the installation is complete.

Script Configuration Steps:

Please list all necessary services to commence under the Services section. Adjust your configuration file for email addresses and logo settings. This script will provide notifications for both successful and unsuccessful events.

To automatically execute the script at a specific time using cronjob, please follow the instructions below:

1. Access the server's terminal and run ***sudo crontab -e***.
2. Scroll to the end of the file, then insert the desired timing and script path. See step **#3**
3. for an illustration.
4. Example: **** /5 * * * * /home/scripts/server-starter.sh***

Support:

For any assistance with the installations and/or any questions, please do not hesitate to contact us at support@justlovetoday.com, or at www.vs-shop.justlovetoday.com/#contact

We value your choice and anticipate the opportunity to support your hosting requirements effectively.
